This is the chance for fanciers to look through part of the list of MNFC 2018 One Loft young birds. These are birds which have proved their ability following a tough training programme and then three Hot Spot races down to the coast where a good number of these birds on offer not only successfully completed the Final race from Carentan but many of them put up excellent results in some of the Hotspot races. Please remember that the people who entered these birds paid no small amount to compete in the series of races. A few entrants have failed to provide us with any details but is this perhaps because their owners intend to buy their birds back?
